Deepak Sambath

IOS & FLUTTER DEVELOPER

✉ deepaks24062000@gmail.com 📞 +91 6383274042

Professional Summary

I am an experienced and results-driven Flutter and iOS developer with 3 years of professional experience in designing, developing, and deploying scalable mobile applications. I have successfully delivered and deployed both native iOS and cross-platform Flutter apps, with a strong focus on clean architecture, intuitive UI/UX design, and performance optimization. My published works include apps on the Play Store such as Glopup User, Glopup Partner, RSL Driver, and RSL Supervisor, and on the App Store such as RSL Driver and RSL Supervisor. I am seeking a challenging role where I can leverage my skills to build impactful user experiences and contribute to business growth.

Employment History

IOS & Flutter Developer, *Nutz technovation private limited*   05/2025
Erode, India

- Developed a multi-role school app for teachers, drivers, and students.
- Implemented real-time student tracking using GPS and Firebase.
- Built a student module for ride booking, notifications, and secure access.
- Designed a driver module to manage pickups/drop-offs and ensure safety compliance.
- Integrated query management via Firebase chat and enabled block booking system for recurring rides.
- Vetsline - Pet Medication & Doctor App
- Built a pet healthcare app for pet owners to manage medications, health records, and reminders.
- Developed a doctor app for veterinarians to handle consultations, prescriptions, and patient history.
- Integrated real-time chat and appointment booking between pet owners and doctors.
- Implemented secure medical data storage with push notifications for reminders and updates.

IOS & Flutter Developer, *Fuzionest Private Limited*   08/2023
Coimbatore, India

- Developed and maintained multiple taxi booking apps using both iOS (Swift) and Flutter
- RSL Supervisor, RSL Driver, and RSL Passenger apps (live on App Store/Play Store)
- Custom white-label taxi apps for different clients
- Built and optimized live tracking features using MapKit and Firebase for real-time vehicle location.
- Contributed to the development of a grocery delivery app in iOS, focusing on smooth checkout and cart management.
- Created a complete opticals e-commerce app in Flutter, supporting product browsing, order placement, and image uploads.
- Integrated Sirikit in iOS apps for voice-command features, improving accessibility and user experience.
- Delivered clean, scalable, and modular code using best practices in Flutter architecture and Swift development.
- Collaborated with UI/UX teams and backend developers to meet business and user requirements.
